Objectives

hope to attain employment in the in diverse industry. My major goal is to broaden my skill set and solve new challenges using innovation. My diversity and cooperative talents would benefit a supportive company that prides socially responsible and environmentally ethical ideals. My ability to be practical with physical roles, can be demonstrated by my work and life experiences. While my academic ideals and wide interests make problem solving and learning easy. I enjoy the sense of achievement that success under pressure brings, easily leading or within a committed positive team a joy and with respect and responsibility I truly excel in any role.

EXPERIENCE

Team Management

Storeman Dan Murphy's Liquor stores

Kelmscott—2010-Present.

Following Landthemes and with the intention of returning to study I obtained employment at the head Dan Murphy's store in Western Australia (Kelmscott). Initially starting as a stock assistant I quickly rose to head store men during the Christmas period of 2010 and was directly in charge of ensuring stock levels for the retail floor. Upon returning to Curtin University at the beginning of semester 1 2011 my current position at Dan Murphy's allows the flexibility to work during the semester and attend full time study while increase my work hours as needed.

Accomplishments

- Professional Experience
- Customer service and cash handling
- Knowledge of Fine wines, spirits and imported beers
- Stock ordering and invoicing
- Induction and OH&S training of new staff
- Loss prevention and theft reporting
- Team management of floor staff

Supervisor, Landthemes,

Perth WA.-- 2009-2010

Starting as a breakaway from Triforce solutions, Landthemes ethos was to provide complete landscaping renovation of private residential properties. I was responsible for and involved in every stage and provided an (unofficial) engineering consultation for all aspects of Landthemes. Our Services include;

Accomplishments

- Client Consultation
- Design Conception and planning
- Initial earthworks and surveying
- Quantity estimation and ordering
- Physical Construction of all design work
- Incorporation of any variation work
- Final handover and future maintenance

Working fulltime for Landthemes during a 1 year break from my study, in order to finance my course, I now work for them casually over weekends and semester breaks.

2IC Landscaping Triforce Solution,

Willetton--2008-2009

Triforce solution began as a small firm whose aim was to provide a complete "backyard Blitz" service for clients. It has the varied experience of the founding members included;

- Landscaping (Hard and Soft)
- Carpentry (Interior and exterior)
- Metal deck roofing (Commercial scale)
- Scaffolding
- Metalworking and welding

I was Head of the Landscaping division taking control of the division from late 2008 until mid 2009 when Landthemes broke away and formed a new company. However during my time at Triforce I gained vast experience in all fields, In particular commercial scale metal deck roofing, Carpentry and scaffolding. I left the company on good terms and have been told that if needed I will always have work there.

Factory Hand Needham Air,

Fremantle--summer 2007

During the summer break in 2007 I worked full time for Needham air-conditioning in Fremantle. The position was manufacturing the commercial and residential ducting. The position involved some extreme working conditions such as very hot working environment and use of fiberglass insulation, as well as cramped and confined spaces. From this position I learnt to tolerate and overcome extreme discomfort, in order to achieve results and "get the job done".

- Filling product orders
- Construction of systems element based on engineering plans
- Complete process work from planning to installation
- General Laboring duties
- Dispatching and delivery of products

Education

Curtin university of Technology – Bentley, Western Australia

Bachelor of Engineering (Civil and Construction), Bachelor of Science (Mining Science)

2012

Curtin university of Technology – Bentley, Western Australia

Bachelor of Science (General) - Bridging fast track for engineering
Completed (non degree)

Further Experience

In addition I have accumulated extensive and varied experience in many areas, since leaving high school in 2000. Below is a shortlist of jobs that I believe contribute to evidence of my work ethic and practical abilities

;

- **Jim's Mowing – 2 years**

Currently I assist a franchisee in City Beach Region and perform all aspects provided by Jim's Mowing service

- **Perth Social Club – 2 years**

PSC is the liquor licensee for events like Big Day Out, Good Vibes and Summer Daze. I worked as a stocker, responsible for maintaining product levels. Quick thinking and fast work in a pressure environment required.

- **Logans landscaping – 4 years**

Small Landscape contractor - started as junior, then leading-hand and supervisor. Similar to Landthemes

- **Westpac Life – 6 months**

Whilst traveling around Australia

Working in Sydney CBD I sold personal life insurance policies to West Pac customers

- **Australia Institute of Mathematics**
- **CAMI educational products**

Two rival companies I worked for. Starting with the Australian institute of Mathematics (AIM) in Perth before transferring to their Melbourne Office where I headed up a product expansion campaign into New South Wales. Several months later I worked in a similar role for CAMI educational products in Parramatta NSW

- **Eagle boys**
- **Dominos**
- **Pizza Hut**
- **Tippy's Pizza**

I have moonlighted as a nighttime and weekend Pizza delivery driver for all of the above businesses. The Quintessential Job for any university student.

- **Kids Cancer Council of WA**
- **Royal Life Saving**
- **State Emergency Service NSW**
- **First Aid for Kids**
- **Blind Dogs Association**

I have worked in telesales on charitable fundraising appeals for all the above causes and believe that despite the negative media telemarketing receives; these appeals do make a difference. I personally experienced talking with a farmer who just lost his property which was destroyed by a bushfire. He had nothing but praise to give regarding the response the SES provided (A service that would be limited without tele-based fundraising)

Hobbies

- Nitro combustion Model car racing – Member of Radio Rally Club
- Subscription to the periodicals- Nature, Scientific America and National Geographic
- Avid Guitarist and amateur music critic
- Regularly play friendly team sport “scratch matches” AFL, Soccer, Tennis and Netball
- Bike riding (motorbike and push bike) and skateboarding

- Fusion style cooking and entertaining

Family

I was born in Geraldton, Western Australia I am the youngest of 5 children. My parents have been married for 32 years and have recently moved to safety bay for retirement. My father was a mechanical engineer and has worked in many roles on an international basis, Including Africa, Holland, Dubai and UK. While my mother has performed homemaking duties.

I was married last December to my wife, Melanie, and we have owned a spacious 4x2 home in Maddington for 3 ½ years. We share closely knit and dependable group of friends and my relationship with her family is about as good as I could wish for. Melanie is in childcare and is unbelievably

passionate about the future of all children, a sentiment I strongly agree with. Together Melanie and I come from two very close families of 11 children (plus their children) and apart from immediate family. We have several friends that have become extended family. Despite all the Turmoil happiness, Sadness and Joy, my family is what I treasure most in life and I would do anything to support and protect them.

I am socially aware and community orientated and personally value respect and tolerance of all above power and wealth. What we do to the world around has a lasting effect that future generation either profit from or become in debt too . Therefore it is a moral reasonability essential that we all act in globally conscience way so we may leave a inspired legacy to our descendants.

Academic Profile

I have achieved two letters of commendation for my outstanding academic performance in my course of study at Curtin University of Technology. These are awarded for receiving an average grade of greater than 75% across all completed units and are based on cumulative performance. My ultimate aim is to continue to maintain a high level of results in my studies and graduate with high distinction honors

Being passionate about knowledge and education I truly subscribe to the principles of lifelong learning. I have always had a thirst for understanding the world around me, in the physical sense as well as from an interpersonal and social level. I see the great potential of the times we live in, the problems that we face in society are challenges to be solved through innovation and evolution of both new and old technologies.

As clichéd as it may sound, I feel changing the world for the better is what engineering is all about. By using the technologies of tomorrow, we can maximize the use of resources today. This will result in a more environmentally friendly and profitable economy for earth's' future and for generations to follow.

Regards Daniel.
